

AI Tools & Prompt Engineering - Course Outline

Lesson 1: Introduction to Artificial Intelligence

- What is AI and how it works in simple terms
- Brief history: from early computers to modern AI
- Types of AI: narrow AI vs general AI
- How AI is already part of your daily life (Siri, Netflix, Google)
- Why learning AI skills matters in 2025 and beyond

Lesson 2: Getting Started with ChatGPT

- What is ChatGPT and how it works (large language models explained)
- Creating an account and navigating the interface
- Your first conversation: asking questions effectively
- Understanding what ChatGPT can and cannot do
- Free vs paid versions: what you get with each

Lesson 3: Prompt Engineering Fundamentals

- What is a prompt and why it matters
- The anatomy of a great prompt: role, context, task, format
- Common prompting mistakes and how to avoid them
- The difference between vague and specific prompts
- Practice: rewriting bad prompts into great ones

Lesson 4: Advanced Prompting Techniques

- Chain-of-thought prompting: making AI think step by step
- Few-shot prompting: teaching AI by example
- System prompts and custom instructions
- Temperature and creativity settings
- Building reusable prompt templates for daily tasks

Lesson 5: AI Tools Beyond ChatGPT

- Claude by Anthropic: strengths and best use cases
- Google Gemini: integration with Google ecosystem
- Microsoft Copilot: AI in Office and Windows

- Comparing AI tools: which one for which task
- Building your personal AI toolkit

Lesson 6: Practical AI Applications for Work

- Writing emails, reports, and documents with AI
- Data analysis and summarization
- Brainstorming and creative problem solving
- Learning new skills faster with AI tutoring
- Automating repetitive tasks with AI workflows
